PROUDLY CRAFTED IN KILKENNY SINCE 1989

Founded in 1989, Image Showers are specialist shower door manufacturers based in the Medieval City of Kilkenny. Our production techniques have evolved but it's the same exacting standards applied to each product range today as when the business began. Image products are crafted by an expert team that boast years of hands-on experience in the showering industry. The people on the factory floor make our products with passion and precision. They are a key part of the research and innovation process- our product is not just well designed, but built by expert hands too.

FROM CONCEPT TO COMPLETION, WE'RE THERE

Our end-to-end service is unique within the industry. We develop shower door solutions from scratch, precisely to customer requirements. We build each product from the finest raw materials at our production facility in Kilkenny. Our trusted fit-out team is on hand to manage a smooth installation process. Our technical engineers are available to service and maintain our shower doors for the duration of the product lifespan. Each Image product comes with a lifetime guarantee and we have a spare parts workshop, giving you peace of mind with your Image shower door.

GUARANTEED FOR LIFE

At Image, every product detail and feature is designed around quality, performance and reliability. Our insistence on manufacturing excellence gives us the confidence to offer a lifetime guarantee across our product ranges.*

LUXURY SHOWER ENCLOSURE COLLECTION i7

COMBINING CONTEMPORARY STYLE WITH AFFORDABILITY

The i7 shower enclosure range delivers smart, functional design that's made to last. With clean lines and a modern edge, each enclosure is thoughtfully crafted to deliver reliable performance that you can count on.

EASY TO INSTALL, EXCEPTIONAL TO EXPERIENCE

The i7 is an expression of intelligent engineering. With a SecureFix Easy Fit System and several additional fast fit features, this 6mm shower enclosure range is built to save installer time onsite.

Designer touches like the rounded solid handle with signature cut-out detail add a refined finish. The i7 collection is reversible, meaning that doors can be installed for left or right hand opening. With 6 door styles and framed and frameless options available, the range is sleek from every angle and tailored to suit your space.

Fresh, modern, and comfortable-style and versatility come as standard in the i7 range, turning every shower into a refreshing experience.

KEY FEATURES

OUICK FIT SYSTEM

i7 Two Door Sliding Quadrant

SECUREFIX EASY FIT SYSTEM

The i7 SecureFix Easy Fit system is engineered for quick and easy installation. The T Shaped SecureFix bracket on the horizontal profile slots securely into place, with a precision engineered 2 prong fastener then locking the profiles tightly together. This screw free assembly system is designed to save time on-site, without compromising on quality.

together.

NEED TO MAKE ADJUSTMENTS?

 Slot the • Secure the horizonal horizontal profile profile into position with the precision into place. engineered fastener.

The SecureFix system can be

easily disassembled, allowing installers to fine-tune its positioning without the need for additional tools.

PRE-ASSEMBLED **ROLLER BRACKETS**

i7 Sliding Products are equipped with preassembled roller brackets, engineered for fast, hassle-free installation. The rollers simply slot into place—no screws required—saving valuable time on site. The ideal choice for professionals who demand speed without sacrificing quality.

OUICK RELEASE ROLLERS

High quality double wheel rollers ensure each sliding door glides along smoothly. The quick release design allows the homeowner to easily clean the bottom wheel track.

SIGNATURE CUT THROUGH HANDLE DESIGN

The i7 handle design combines smooth, rounded edges with our signature cut-through detailing for a distinctive, modern look. Precision-engineered from chrome-plated zinc, it offers exceptional durability and longlasting performance for the ever-demanding bathroom environment.

ISHIELD PROTECTIVE GLASS COATING

EASY CLEAN GLASS

iShield protective coating helps prevent the build-up of limescale and soap deposits on the glass surface. This hydrophobic coating ensures that water droplets roll down the glass surface.

WITH ISHIELD

WITHOUT ISHIELD

Without iShield protective coating, soap and water residue can bond to the surface of the glass resulting in a build up of grime.

The iShield intelligent surface helps prevent the build up of limescale and soap deposits, ensuring that water droplets simply roll away from the surface.

GO BESPOKE: Image Showers are Ireland's leading made-to-measure shower door specialist. If you don't see a suitable door size or specification in our standard i7 range, please contact us and we will custom design the perfect solution to your requirements. LET US CREATE YOUR DREAM SHOWER SPACE

imageshowers.com

i9 LUXURY SHOWER ENCLOSURE COLLECTION

BRING COLOUR TO YOUR DREAM SHOWER ZONE

Elevate your bathroom with the i9 Shower Door Series — where sleek design meets everyday functionality. Defined by crisp lines, premium materials, and modern elegance, the i9 is built to impress and engineered to last. Its star feature is OPTIWHITE Glass, featuring a low iron content for a pure, crystal-clear appearance that adds brightness and depth to your bathroom space.

Standing tall at 2 metres, each door is constructed from 8mm toughened safety glass with an iShield hydrophobic coating, which reduces the build up of grime and limescale. Full length magnetic seals guarantees a flawless close action. Designed for ease of maintenance, i9 sliding doors also feature quick-release rollers.

SIX DYNAMIC COLOUR OPTIONS

Colour choice is at the heart of the new i9 shower door collection. From bold modern tones to timeless classics, this versatile collection empowers you to create a shower space that's truly your own.

Chrome	Black
Brushed Brass	Brushed Bronze
Brushed Nickel	Gunmetal

ANODISED COLOUR FINISH

Each i9 door is crafted from hardwearing Anodised Aluminium. Offering exceptional durability, the Anodising process creates a protective oxide layer on the surface of aluminium to enhance its corrosion resistance and durability. This makes it particularly suitable for the hardworking bathroom environment where moisture and humidity are present.

Colour stability is guaranteed with the Anodising process. The colour is embedded into the metal itself so i9 shower doors maintain a beautifully natural colour finish for the duration of their lifespan.

NEW OPTIWHITE GLASS TECHNOLOGY

Unlike standard shower door glass which typically has a green tinge, OPTIWHITE Glass has a lower iron content, giving it a superior, crystal-clear appearance. It is the perfect choice for applications where glass edges are exposed and when colour purity is a priority in the design.

Image Showers are first to market with OPTIWHITE Glass technology, allowing our customers to craft sleek and sophisticated shower sanctuaries. This innovative material brings a refined touch to any bathroom, providing an ultra clear glass finish that enhances both style and functionality.

EASY CLEAN GLASS

iShield protective coating helps prevent the build-up of limescale and soap deposits on the glass surface. This hydrophobic coating ensures that water droplets roll down the glass surface.

WITHOUT ISHIELD

Without iShield protective coating, soap and water residue can bond to the surface of the glass resulting in a build up of grime.

Standard Glass

70% clarity

Optiwhite Glass

90% clarity

WITH ISHIELD

The iShield intelligent surface helps prevent the build up of limescale and soap deposits, ensuring that water droplets simply roll away from the surface.

GO BESPOKE: Image Showers are Ireland's leading made-to-measure shower door specialist. If you don't see a suitable door size or specification in our standard i9 range, please contact us and we will custom design the perfect solution to your requirements. Contact us on: bespoke@imageshowers.com | 056 7723374

SEAMLESS CUT THROUGH HANDLE DESIGN

Our unique i9 handle design is sleek and sophisticated. Crafted from chrome plated zinc material that is durable and hardwearing.

LUXURY COLOUR FINISHES

Brushed Bronze

Brushed Nickel

STANDARD COLOUR FINISHES

Chrome Black

QUICK RELEASE ROLLERS

High quality double wheel rollers with stainless steel ball bearings ensure each sliding door glides along smoothly. The quick release design allows the homeowner to easily clean the bottom wheel track. MAGNETIC SEALS

The cushioned magnetic seal design ensures a firm door closure and guaranteed water retention. The anodised metal seal composition does not discolour or degenerate over time.

INFORMATION & MAINTENANCE

PRODUCT

All products are manufactured in accordance with iSO 9001 and EN 14428 and utilise toughened safety glass to EN12150-1 class A standard. Aluminium sections are extruded to BS 1474 from alloys complying with BS 6463 and coated to BS 6464. Doors and enclosures have been tested in accordance with EN 14428 and are suitable for use with modern power showers. The position of all shower valves in the brochure are for illustrative purposes only.

CE AND EN INFORMATION

The CE marking on The Company's products is a declaration that the product complies with the essential requirements of the European health, safety and environmental protection legislation.

The CE marking on a product indicates to government officials that the product may be legally placed on the market in their country. This ensures the free movement of the product within EFTA and the European Union single market and permits the withdrawal of the non conforming products by customs and enforcement authorities.

The European Union's "new approach directives" are mandatory on all member countries to enact through national legislation. This legislation requires manufacturers to display a CE marking on their product, packaging and accompanying literature. Where a new approach directive is in force, it is (with few exceptions) an offence to place a product on the market without a CE marking.

Often consumers will consider CE marking on a product as an indication of conformance to laid down minimum standards and therefore, a minimum level of safety which other products may lack. CE marking is for many consumers a "Symbol of Safety"

DELIVERIES

Deliveries should be inspected immediately after receipt and any discrepancies should be notified within 7 days. Notifications received after this period will not be accepted. Goods supplied are subject to carriage charge* ask The company for details*. Lead time direct to a reseller is 3 working days.

CLEANING

It is important to clean your shower door and tray after every use. Here is what we recommend:

- Wipe down all the glass and metal parts with a soft cloth.
- Do not allow lime scale to build up in hard water areas.
- Ensure that any residual water on the glass is removed after every use.
- Clean the glass regularly with soapy water.
- Do not use any abrasive products on any surfaces.
- Install enclosures in a well ventilated area.
- Always read the instructions on the packaging.

Bathroom products are vulnerable to acid attack and some strong household cleaners including strong disinfectants, denture cleaners, hair dyes, wine making chemicals and photographic chemicals may contain acid. These materials may have a varying effect on the surface, from black spots/streaks (which cannot be removed) to pitting the surface. Contact with these materials should be avoided.

SHOWER ENCLOSURE ADJUSTMENT

This is the min and max adjustment of the actual enclosure. These are the adjustment dimensions of the actual door excluding the tray. Therefore, these are the dimensions to follow when installing an enclosure in a wet room application without a tray.

The guide below may be helpful in taking measurements to determine the shower door or enclosure size required. Dimensions given in this publication are in millimetres, are approximate and may vary with adjustment. They are subject to change without notice.

Please note that when a tray is fitted, it is essential that the tray is level before any doors or enclosures are fitted. Uneven trays may lead to leakages and would invalidate our guarantee.

BATH SCREEN INFORMATION

Bath Screens are not designed to fit on baths with stepped fronts, roll top rims, or integral soap dishes. Fitting of Screens on baths which have raised head rests or shapes, is not recommended.

There must be no items causing obstruction with the seal and bath, as any of the above may cause leaks. When choosing your Bath Screen, please ensure that if your bath has bath handles, that they do not interfere with the bath rim area where your Screen will be placed.

When choosing an in-swing or folding Bath Screen please ensure that your swing area is not interfering with any brassware or internal shower features. Similarly, when choosing an out-swing, please ensure that the out-swing area is free from any obstructions.

IMPORTANT SHOWER TRAY INFORMATION

Although shower door and enclosure sizes are related to tray sizes, it is important to note that most shower trays are tiled down to the rim, often over an "up-stand". The finished installation space may be less than the nominal tray size. Shower units are made to suit this remaining space.

TRAY FINISH MIN – MAX

The tray finish applies when fitting a door and a tray. These are the minimum and maximum dimensions that a shower door or enclosure will fit using standard wall profiles.

To find the correct tray finish dimension:

- In a recess: measure from the finished, tiled wall to the opposite finished , tiled wall.
- In a corner: measure from the finished, tiled wall to the edge of the tray.

Note: If the wall/walls are leaning in, this will further reduce your tray finish.

Please ensure that the size of shower tray is as per your order before installation. You must inspect the product thoroughly before installation. Fitting the product is acceptance of quality. Tray heights may vary due to manufacturing tolerances.

Where your shower tray is not fully enclosed, please ensure that your panel is at least ¾ of the length of your tray size. Please ensure that the shower head is not positioned over the waste as this may restrict flow rate.

RETURNS

No return of goods will be accepted by The Company without prior authorisation and compliance with our returns procedure.

In the event that the customer returns any goods which are not defective, such goods will be accepted by The Company only if they are returned to The Company in an undamaged, resalable condition, which requires that the goods are unused and contained within their original, unopened and undamaged packaging.

In the event that the customer wishes to return non-defective goods to The Company following the expiry of the 21 day period, The Company will have absolute sole discretion as to whether it shall offer a refund to the customer in respect of such goods.

In relation to any returns made, The Company will deduct 40% of the price paid for the relevant goods and The Company will deduct a discretionary restocking fee (which may exceed 40% of the price paid for the relevant goods) plus the cost of carriage, from the sums refunded to the customer, in order to cover The Company's administration and restocking costs.

The company will not accept any return of (or issue any refund or credit in respect of) non-faulty goods more than 30 days following the delivery date.

If a return of goods has been agreed by The Company, it will arrange a collection date with its courier. If The Company or its courier is unable to collect the goods on the date proposed by the courier due to any act or omission by the customer, then an administration fee will be payable by the customer (which The Company may deduct from any sums refunded to the customer).

GENERAL

All products are supplied complete with full installation instructions and the necessary fixings Check with your dealer for accurate matching of material samples. Product descriptions do not imply the use of precious or valuable materials.

Our policy of reviewing product design and development on a regular basis means The Company reserve the right to change product specifications and prices without notice.

Glass shattering and parts subject to wear are not covered by the lifetime guarantee.

Trays shown in this catalogue are for illustrative purposes only.

Images are for illustrative purposes only. The colours and finishes shown in the catalogue are as accurate as possible within the limits of the printing process. The positioning of all shower heads in the brochure is for illustrative purposes only. All descriptions, specifications and particulars contained in this brochure are intended merely to represent a general idea of the products described herein and none of these form part of any contract to give rise to any independent or collateral liability upon The Company.

Prices are correct at the time of print with the rate of VAT which applies at the time. Due to circumstances beyond our control, prices may be altered including changes to the rate of VAT.

Due to our policy of continuous improvement, we reserve the right to amend prices, specifications and designs without prior notice. Images are for illustrative purposes only. The colours and finishes shown in the catalogue are as accurate as possible within the limits of the printing process. All descriptions, specifications and particulars contained in this brochure are intended merely to represent a general idea of the products described herein and none of these form part of any contract to give rise to any independent or collateral liability upon the company.

LIABILITY

In the event of any breach of The Company's obligations, the remedies of the customer will be limited through damages.

Except as set out in these conditions, all warranties, conditions and other terms impaled by law (whether by statute, common law or otherwise), are to the fullest extent permitted by the law, excluded from the contract.

The Company's maximum aggregate liability arising out of or in connection with a contract, whether in a contract, tort, misrepresentation under statute or otherwise, howsoever caused including any liability under an indemnity contained in the contract and/ or arising from a breach of, or a failure to perform or defect or delay in performance of, any of The Company's obligations under the contract and/or any defect in any of the goods supplied under the contract and/or any use made or resale of any such goods by the customer or of any product incorporating any of such goods shall be limited to the aggregate price paid or payable under the contract.

The company shall not have any liability to the customer for any loss of profit (direct or indirect); loss of revenue, loss of production or loss of business (in each case whether direct or indirect); loss of goodwill, loss of reputation or loss of opportunity (in each case whether direct or indirect); loss of anticipated saving or loss of margin(whether direct or indirect); liability of the customer to third parties (whether direct or indirect): consequential or special loss arising out of or in connection with the contract, whether in contact, tort or misrepresentation under the statute or otherwise, howsoever caused including by negligence and/or arising from a breach of, or a failure to perform or detect or delay in performance of, any of The Company's obligations under the contract.

Nothing in the contract shall operate to exclude or restrict The Company's liability (if any) to the customer for breach of its obligations arising under section 12 of the Sale of Goods Act 1979: for breach of its obligations arising under section 2 of the Supply of Goods and Services Act 1982; for death or personal injury resulting from its negligence; for its fraud or fraudulent misrepresentation; or for any matter for which it is not permitted by the law to exclude or limit, or to attempt to exclude or limit, its liability.

SUSTAINABILITY COMMITMENT

Image Showers care about the impact our business makes on our environment. We are focused on sustainable operations and place great value on the wellbeing of our team, clients and community.

Our factory is powered by solar panels, with LED lighting upgrades completed in 2023. Thanks to our in-house production capability and spare parts department, there is reduced wastage of raw materials and products within our product pipeline. We segregate our waste on-site.

We have developed our packaging to reduce the use of polystyrene and increase its recyclability.

Since 2025, our marketing materials are developed in conjunction with a leading eco-friendly graphic design studio and printers.

This brochure was designed with green energy, and it is printed on FSC® Certified and Carbon Balanced paper.
