PROUDLY CRAFTED IN KILKENNY SINCE 1989

CRAFTED IN KILKENNY. DESIGNED FOR LIFE.

iMAGE Showers began in 1989 in a humble haybarn in Co. Kilkenny, a place renowned for Irish craftsmanship. From these modest beginnings, we have grown into one of Ireland's leading shower door specialists, known for precision engineering, timeless design and an unwavering commitment to quality.

For over 35 years, our story has been one of resilience, innovation, and dedication to doing things the right way. From classic ranges like the Ultra, Diamond and Allure, to modern innovations such as the i6, i3 Easy-Fit and the i7, our products are trusted by generations of homeowners and professionals alike.

What sets iMAGE apart is not just what we make, but how we make it. We remain the only shower door manufacturer still producing in Ireland, allowing us to maintain full control over quality, design and sustainability.

Our latest offerings – from the sleek iDrain system to our slate trays and Opti-White glass colour range – reflect our commitment to evolving with our customers' needs while remaining rooted in quality and craftsmanship.

With a newly upgraded factory and showroom in Kilkenny, we are building for the future while staying true to our heritage. Every iMAGE product is thoughtfully designed to enhance daily wellness, transforming a functional space into a sanctuary. Whether it's a bespoke shower solution or a ready-to-fit door, our work is driven by a passion for elevating everyday moments.

At iMAGE Showers, we believe in more than just shower doors. We believe in beauty, longevity and responsibility, to our craft, our customers and our planet.

GUARANTEED FOR LIFE

At Image, every product detail and feature is designed around quality, performance and reliability. Our insistence on manufacturing excellence gives us the confidence to offer a lifetime guarantee across our product ranges.*

SUSTAINABILITY COMMITMENT

At iMAGE, sustainability is not a trend, it's a responsibility we take seriously. Here's how we're making a difference:

- **Solar-Powered Production:** Our entire Kilkenny factory is powered by renewable energy, with 110 solar PV panels on our roof generating clean electricity for our enterprise.
- **Smarter Packaging:** We've redesigned our packaging to minimise material use and ensure it's fully recyclable, reducing waste across the supply chain.
- **Product Circularity:** Returned products are broken down so individual components can be reused or recycled, avoiding landfill and giving materials a second life.
- **Longer Product Lifespan:** We offer spare parts for every model, allowing customers to maintain their shower doors for years rather than replacing them prematurely.
- **Eco-Friendly Choices:** From LED lighting throughout our premises to using sustainable printers we are committed to making more environmentally friendly choices.

Our goal is clear: to create beautiful, durable products that respect the planet, not just today, but for future generations.

iMAGE BESPOKE

Image Showers are experts in the design and manufacture of bespoke showering solutions, created precisely to client specification. Our in-house manufacturing team have decades of specialist knowledge in crafting made to measure solutions for more unusual shower design requirements. Image products are of enduring quality and built from the finest raw materials at our production facility in Kilkenny, Ireland. A lifetime guarantee extends across our products, with spare parts readily available for ultimate peace of mind*.

Image is the bespoke shower door specialist – we are the preferred supplier for many prestigious hotel & commercial projects nationwide. Our expert design, measurement and installation service is trusted within the industry.

Image offer a complete end-to-end service - from initial site visit, design concept development, to product manufacture, through to installation and after-sales maintenance.

FROM CONCEPT TO COMPLETION, WE'RE THERE

Liss Ard Estate, West Cork

HENNESSY FARMHOUSE: A Bespoke Shower Built Around a Family's Vision

Set on the land where her husband grew up, Hennessy Farmhouse is a home shaped by heritage, intention, and modern design. When Thenia and her family began building their new home in 2022, they envisioned interiors that felt calm, warm, and timeless - a modern farmhouse grounded in soft whites, warm oak, and elegant brass accents. And **at the heart of that vision was the master ensuite.**

Long before construction ever began, Thenia had been gathering ideas on Pinterest - collecting images of serene, spa-like bathrooms, oversized showers, and the kind of gentle, minimalist luxury she wanted to bring into her own home. By the time she began working closely with Liam from the Bathroom and Tile Gallery in New Ross, she already had a clear emotional direction: the ensuite needed to feel like a retreat, not just a functional room.

Together, they explored layouts, finishes, and proportions. Early drafts included a half wall with glazing above, but as the design matured, both Liam and Thenia agreed that a full glass front would achieve the openness and elegance the space was calling for. When

Thenia found an Image Showers enclosure online that mirrored everything she loved, the decision to go bespoke became obvious.

With a room this size, a standard enclosure simply wasn't an option - **a custom design was the only way to honour the scale, symmetry, and clean lines she had imagined.**

From the first point of contact, the design stage with the Image Showers team was seamless. Technical questions were handled with warmth and expertise. Measurements were checked and re-checked. Hinge placement, door direction, wall structure - every detail was considered to ensure that the final result would sit perfectly within the space. Bit by bit, her Pinterest vision became something real and dimensional.

The final enclosure stands 2200mm high in 10mm clear glass, framed in slim brushed brass with matching fittings and a brass slim-line drain. Without the need for a tray, a custom mosaic floor flows directly into the rest of the ensuite tiles, allowing the glass to sit lightly within the room, bringing light, clarity, and a feeling of calm luxury.

A Fitting Experience That Matched the Vision

When the fitting day arrived, Thenia described it as one of the most reassuring moments of the entire build. The Image Showers fitting team arrived exactly as scheduled, introduced themselves clearly, and immediately set about preparing the room with quiet professionalism. There was no rush, no chaos - just a steady, confident pace that spoke of experience and pride in their craft.

Every component was handled with care. Each piece of glass was inspected before installation. Measurements were verified one final time. The team communicated what they were doing and why, making the process feel collaborative and transparent rather than technical or intimidating.

Small details stood out - the precision in levelling the glass, the thoughtful checking of clearances, the gentle way they protected surrounding finishes. Even the way they cleaned as they worked made the installation feel elevated, controlled, and respectful of the home they were stepping into.

By the time they finished, the enclosure looked as though it had always belonged there. The brass aligned perfectly with the shower fittings; the glass sat flawlessly on the mosaic floor; the entire structure felt substantial yet weightless. The team tidied every surface, removed all packaging, and left the room immaculate - as if they had never been there, except for the beautiful enclosure they left behind.

For Thenia, the fitting process cemented her confidence that she had chosen the right team. It was the final, essential step where craftsmanship met care - the finishing touch that turned a concept into something exceptional. Today, the bespoke enclosure sits at the heart of the master ensuite, elevating the room with its openness, clarity, and warm brass detailing. It has transformed daily routines, making the space feel calm, indulgent, and quietly luxurious. When shared on Instagram, the response was immediate and enthusiastic - a testament to both the design and the craftsmanship behind it.

For Thenia, choosing a bespoke enclosure from Image Showers wasn't just a design choice; it was an investment in creating a space that reflects her family's story, her aesthetic, and the serene, welcoming home they have built together.

i9 LUXURY SHOWER ENCLOSURE COLLECTION

Bring Colour to Your Dream Shower Zone

Elevate your bathroom with the i9 Shower Door Series — where sleek design meets everyday functionality. Defined by crisp lines, premium materials, and modern elegance, the i9 is built to impress and engineered to last. Its star feature is OPTIWHITE Glass, featuring a low iron content for a pure, crystal-clear appearance that adds brightness and depth to your bathroom space.

Standing tall at 2 metres, each door is constructed from 8mm toughened safety glass with an iShield hydrophobic coating, which reduces the build up of grime and limescale. Full length magnetic seals guarantees a flawless close action. Designed for ease of maintenance, i9 sliding doors also feature quick-release rollers.

ANODISED COLOUR FINISH

Each i9 door is crafted from hardwearing Anodised Aluminium. Offering exceptional durability, the Anodising process creates a protective oxide layer on the surface of aluminium to enhance its corrosion resistance and durability. This makes it particularly suitable for the hardworking bathroom environment where moisture and humidity are present.

Colour stability is guaranteed with the Anodising process. The colour is embedded into the metal itself so i9 shower doors maintain a beautifully natural colour finish for the duration of their lifespan.

SIX DYNAMIC COLOUR OPTIONS

Colour choice is at the heart of the new i9 shower door collection. From bold modern tones to timeless classics, this versatile collection empowers you to create a shower space that's truly your own.

|  Brushed Nickel |  Gunmetal |

i9 Inswing Door with Side Panel
in Brushed Bronze (Left Hand Opening)

i9 INNOVATION HIGHLIGHTS

NEW OPTIWHITE GLASS TECHNOLOGY

Unlike standard shower door glass which typically has a green tinge, OPTIWHITE Glass has a lower iron content, giving it a superior, crystal-clear appearance. It is the perfect choice for applications where glass edges are exposed and when colour purity is a priority in the design.

Image Showers are first to market with OPTIWHITE Glass technology, allowing our customers to craft sleek and sophisticated shower sanctuaries. This innovative material brings a refined touch to any bathroom, providing an ultra clear glass finish that enhances both style and functionality.

iSHIELD PROTECTIVE GLASS COATING

EASY CLEAN GLASS

iShield protective coating helps prevent the build-up of limescale and soap deposits on the glass surface. This hydrophobic coating ensures that water droplets roll down the glass surface.

WITHOUT iSHIELD

Without iShield protective coating, soap and water residue can bond to the surface of the glass resulting in a build up of grime.

WITH iSHIELD

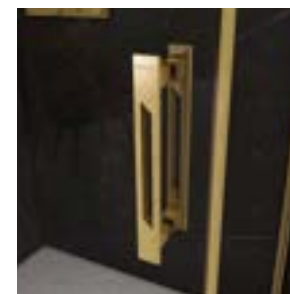

The iShield intelligent surface helps prevent the build up of limescale and soap deposits, ensuring that water droplets simply roll away from the surface.

GO BESPOKE: Image Showers are Ireland's leading made-to-measure shower door specialist. If you don't see a suitable door size or specification in our standard i9 range, please contact us and we will custom design the perfect solution to your requirements. LET US CREATE YOUR DREAM
SHOWER SPACE

[imageshowers.com](https://www.imageshowers.com)

i7

LUXURY SHOWER ENCLOSURE COLLECTION

Combining Contemporary Style with Affordability

The i7 shower enclosure range delivers smart, functional design that's made to last. With clean lines and a modern edge, each enclosure is thoughtfully crafted to deliver reliable performance that you can count on.

EASY TO INSTALL, EXCEPTIONAL TO EXPERIENCE

The i7 is an expression of intelligent engineering. With a **SecureFix Easy Fit System** and several additional fast fit features, this 6mm shower enclosure range is built to save installer time onsite.

Designer touches like the rounded solid handle with signature cut-out detail add a refined finish. The i7 collection is reversible, meaning that doors can be installed for left or right hand opening. With 6 door styles and framed and frameless options available, the range is sleek from every angle and tailored to suit your space.

Fresh, modern, and comfortable—style and versatility come as standard in the i7 range, turning every shower into a refreshing experience.

KEY FEATURES

↑ 2 metres high

★ Lifetime Guarantee*

⚒ 6 mm toughened safety glass

📏 signature chrome handle design

↔ up to 40mm adjustment

⚙ preassembled double rollers

🛡 iShield easy clean glass

☑ chrome finish

↻ reversible design

SecureFix
EASY FIT SYSTEM

i7 Two Door Sliding Quadrant

SECUREFIX EASY FIT SYSTEM

The i7 SecureFix Easy Fit system is engineered for quick and easy installation. The T Shaped SecureFix bracket on the horizontal profile slots securely into place, with a precision engineered 2 prong fastener then locking the profiles tightly together. This screw free assembly system is designed to save time on-site, without compromising on quality.

1

Align the horizontal and vertical profiles together.

2

- Slot the horizontal profile down securely into place.
- Secure the horizontal profile into position with the precision engineered fastener.

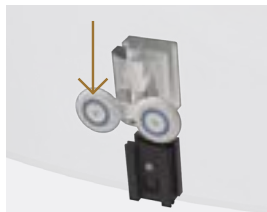

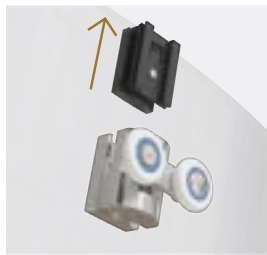

NEED TO MAKE ADJUSTMENTS?

The SecureFix system can be easily disassembled, allowing installers to fine-tune its positioning without the need for additional tools.

Choose to use SecureFix – **Hassle-free installation and long-lasting performance.**

PRE-ASSEMBLED ROLLER BRACKETS

i7 Sliding Products are equipped with preassembled roller brackets, engineered for fast, hassle-free installation. The rollers simply slot into place—no screws required—saving valuable time on site. The ideal choice for professionals who demand speed without sacrificing quality.

QUICK RELEASE ROLLERS

High quality double wheel rollers ensure each sliding door glides along smoothly. The quick release design allows the homeowner to easily clean the bottom wheel track.

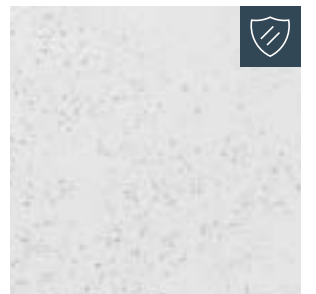

i7 INNOVATION HIGHLIGHTS

SIGNATURE CUT THROUGH HANDLE DESIGN

The i7 handle design combines smooth, rounded edges with our signature cut-through detailing for a distinctive, modern look. Precision-engineered from chrome-plated zinc, it offers exceptional durability and long-lasting performance for the ever-demanding bathroom environment.

iSHIELD PROTECTIVE GLASS COATING

EASY CLEAN GLASS

iShield protective coating helps prevent the build-up of limescale and soap deposits on the glass surface. This hydrophobic coating ensures that water droplets roll down the glass surface.

WITHOUT iSHIELD

Without iShield protective coating, soap and water residue can bond to the surface of the glass resulting in a build up of grime.

WITH iSHIELD

The iShield intelligent surface helps prevent the build up of limescale and soap deposits, ensuring that water droplets simply roll away from the surface.

GO BESPOKE: Image Showers are Ireland's leading made-to-measure shower door specialist. If you don't see a suitable door size or specification in our standard i7 range, please contact us and we will custom design the perfect solution to your requirements. iBATHSCREEN COLLECTION

The ibathscreen collection is designed to complement both traditional and contemporary bathroom styles without compromising on elegance or functionality. With an extensive range of shapes and sizes, each screen adds a refined touch to any bathroom setting.

KEY FEATURES

↑ ↓ **1400** mm high

🔧 **6/8** mm toughened safety glass

🛡️ iShield easy clean glass

↻ reversible design

A STYLISH AND VERSATILE BATHSCREEN COLLECTION

Crafted in the heart of Kilkenny, our bathscreens are made with toughened safety glass and feature an easy-clean coating for everyday convenience. Backed by a lifetime guarantee, each of the 14 elegant designs in the Image Showers range offers a unique and practical solution for over-bath showering.

With six dynamic colour options to choose from, it's easy to find the perfect style to complement your bathroom.

I-DRAIN® AIO in Yellow Gold

THE ALL-IN-ONE DESIGN DRAIN

- **Built-in Height:** 58 mm
- **Flow Capacity:** 31 l/min
- **Two Fixed Lengths:** 950mm or 1150mm
- **Length-adjustable Grating:** 33 mm wide
- **Can Be Shortened:** for a wall-to-wall effect (cutting disk included in box)
- **Optional Extensions:** to extend the grating
- **Siphon can rotate 360°:** allows for connection in any direction
- **Horizontal and Vertical Connection Option**
- **Stainless Steel Grating:** standard in box

I-DRAIN® AIO is standard supplied with a stainless steel grating* (standard in box). The drain is also compatible with a matt black decorative profile or a profile with a Yellow Gold PVD coating**.

INFORMATION & MAINTENANCE

PRODUCT

All products are manufactured in accordance with ISO 9001 and EN 14428 and utilise toughened safety glass to EN12150-1 class A standard. Aluminium sections are extruded to BS 1474 from alloys complying with BS 6463 and coated to BS 6464. Doors and enclosures have been tested in accordance with EN 14428 and are suitable for use with modern power showers. The position of all shower valves in the brochure are for illustrative purposes only.

CE AND EN INFORMATION

The CE marking on The Company's products is a declaration that the product complies with the essential requirements of the European health, safety and environmental protection legislation.

The CE marking on a product indicates to government officials that the product may be legally placed on the market in their country. This ensures the free movement of the product within EFTA and the European Union single market and permits the withdrawal of the non conforming products by customs and enforcement authorities.

The European Union's "new approach directives" are mandatory on all member countries to enact through national legislation. This legislation requires manufacturers to display a CE marking on their product, packaging and accompanying literature. Where a new approach directive is in force, it is (with few exceptions) an offence to place a product on the market without a CE marking.

Often consumers will consider CE marking on a product as an indication of conformance to laid down minimum standards and therefore, a minimum level of safety which other products may lack. CE marking is for many consumers a "Symbol of Safety"

DELIVERIES

Deliveries should be inspected immediately after receipt and any discrepancies should be notified within 7 days. Notifications received after this period will not be accepted.

Goods supplied are subject to carriage charge* ask The company for details*. Lead time direct to a reseller is 3 working days.

CLEANING

It is important to clean your shower door and tray after every use. Here is what we recommend:

- Wipe down all the glass and metal parts with a soft cloth.
- Do not allow lime scale to build up in hard water areas.
- Ensure that any residual water on the glass is removed after every use.
- Clean the glass regularly with soapy water.
- Do not use any abrasive products on any surfaces.
- Install enclosures in a well ventilated area.
- Always read the instructions on the packaging.

Bathroom products are vulnerable to acid attack and some strong household cleaners including strong disinfectants, denture cleaners, hair dyes, wine making chemicals and photographic chemicals may contain acid. These materials may have a varying effect on the surface, from black spots/streaks (which cannot be removed) to pitting the surface. Contact with these materials should be avoided.

SHOWER ENCLOSURE ADJUSTMENT

This is the min and max adjustment of the actual enclosure. These are the adjustment dimensions of the actual door excluding the tray. Therefore, these are the dimensions to follow when installing an enclosure in a wet room application without a tray.

The guide below may be helpful in taking measurements to determine the shower door or enclosure size required. Dimensions given in this publication are in millimetres, are approximate and may vary with adjustment. They are subject to change without notice.

Please note that when a tray is fitted, it is essential that the tray is level before any doors or enclosures are fitted. Uneven trays may lead to leakages and would invalidate our guarantee.

All size and adjustment details refer to tray installations. For wetroom installations, please refer to the specific range overview.

BATH SCREEN INFORMATION

Bath Screens are not designed to fit on baths with stepped fronts, roll top rims, or integral soap dishes. Fitting of Screens on baths which have raised head rests or shapes, is not recommended.

There must be no items causing obstruction with the seal and bath, as any of the above may cause leaks. When choosing your Bath Screen, please ensure that if your bath has bath handles, that they do not interfere with the bath rim area where your Screen will be placed.

When choosing an Inswing or folding Bath Screen please ensure that your swing area is not interfering with any brassware or internal shower features. Similarly, when choosing an out-swing, please ensure that the out-swing area is free from any obstructions.

IMPORTANT SHOWER TRAY INFORMATION

Although shower door and enclosure sizes are related to tray sizes, it is important to note that most shower trays are tiled down to the rim, often over an "up-stand". The finished installation space may be less than the nominal tray size. Shower units are made to suit this remaining space.

TRAY FINISH MIN – MAX

The tray finish applies when fitting a door and a tray. These are the minimum and maximum dimensions that a shower door or enclosure will fit using standard wall profiles.

To find the correct tray finish dimension:

- In a recess: measure from the finished, tiled wall to the opposite finished, tiled wall.
- In a corner: measure from the finished, tiled wall to the edge of the tray.

Note: If the wall/walls are leaning in, this will further reduce your tray finish.

Please ensure that the size of shower tray is as per your order before installation. You must inspect the product thoroughly before installation. Fitting the product is acceptance of quality. Tray heights may vary due to manufacturing tolerances.

Where your shower tray is not fully enclosed, please ensure that your panel is at least ¾ of the length of your tray size. Please ensure that the shower head is not positioned over the waste as this may restrict flow rate.

RETURNS

No return of goods will be accepted by The Company without prior authorisation and compliance with our returns procedure.

In the event that the customer returns any goods which are not defective, such goods will be accepted by The Company only if they are returned to The Company in an undamaged, resalable condition, which requires that the goods are unused and contained within their original, unopened and undamaged packaging.

In the event that the customer wishes to return non-defective goods to The Company following the expiry of the 21 day period, The Company will have absolute sole discretion as to whether it shall offer a refund to the customer in respect of such goods.

In relation to any returns made, The Company will deduct 40% of the price paid for the relevant goods and The Company will deduct a discretionary restocking fee (which may exceed 40% of the price paid for the relevant goods) plus the cost of carriage, from the sums refunded to the customer, in order to cover The Company's administration and restocking costs.

The company will not accept any return of (or issue any refund or credit in respect of) non-faulty goods more than 30 days following the delivery date.

If a return of goods has been agreed by The Company, it will arrange a collection date with its courier. If The Company or its courier is unable to collect the goods on the date proposed by the courier due to any act or omission by the customer, then an administration fee will be payable by the customer (which The Company may deduct from any sums refunded to the customer).

GENERAL

All products are supplied complete with full installation instructions and the necessary fixings. Check with your dealer for accurate matching of material samples. Product descriptions do not imply the use of precious or valuable materials.

Our policy of reviewing product design and development on a regular basis means The Company reserve the right to change product specifications and prices without notice.

Glass shattering and parts subject to wear are not covered by the lifetime guarantee.

Trays shown in this catalogue are for illustrative purposes only.

Images are for illustrative purposes only. The colours and finishes shown in the catalogue are as accurate as possible within the limits of the printing process. The positioning of all shower heads in the brochure is for illustrative purposes only. All descriptions, specifications and particulars contained in this brochure are intended merely to represent a general idea of the products described herein and none of these form part of any contract to give rise to any independent or collateral liability upon The Company.

Prices are correct at the time of print with the rate of VAT which applies at the time. Due to circumstances beyond our control, prices may be altered including changes to the rate of VAT.

Due to our policy of continuous improvement, we reserve the right to amend prices, specifications and designs without prior notice. Images are for illustrative purposes only. The colours and finishes shown in the catalogue are as accurate as possible within the limits of the printing process. All descriptions, specifications and particulars contained in this brochure are intended merely to represent a general idea of the products described herein and none of these form part of any contract to give rise to any independent or collateral liability upon the company.

LIABILITY

In the event of any breach of The Company's obligations, the remedies of the customer will be limited through damages.

Except as set out in these conditions, all warranties, conditions and other terms implied by law (whether by statute, common law or otherwise), are to the fullest extent permitted by the law, excluded from the contract.

The Company's maximum aggregate liability arising out of or in connection with a contract, whether in a contract, tort, misrepresentation under statute or otherwise, howsoever caused including any liability under an indemnity contained in the contract and/or arising from a breach of, or a failure to perform or defect or delay in performance of, any of The Company's obligations under the contract and/or any defect in any of the goods supplied under the contract and/or any use made or resale of any such goods by the customer or of any product incorporating any of such goods shall be limited to the aggregate price paid or payable under the contract.

The company shall not have any liability to the customer for any loss of profit (direct or indirect); loss of revenue, loss of production or loss of business (in each case whether direct or indirect); loss of goodwill, loss of reputation or loss of opportunity (in each case whether direct or indirect); loss of anticipated saving or loss of margin (whether direct or indirect); liability of the customer to third parties (whether direct or indirect); consequential or special loss arising out of or in connection with the contract, whether in contract, tort or misrepresentation under the statute or otherwise, howsoever caused including by negligence and/or arising from a breach of, or a failure to perform or detect or delay in performance of, any of The Company's obligations under the contract.

Nothing in the contract shall operate to exclude or restrict The Company's liability (if any) to the customer for breach of its obligations arising under section 12 of the Sale of Goods Act 1979; for breach of its obligations arising under section 2 of the Supply of Goods and Services Act 1982; for death or personal injury resulting from its negligence; for its fraud or fraudulent misrepresentation; or for any matter for which it is not permitted by the law to exclude or limit, or to attempt to exclude or limit, its liability.

SUSTAINABILITY COMMITMENT

Image Showers care about the impact our business makes on our environment. We are focused on sustainable operations and place great value on the wellbeing of our team, clients and community.

Our factory is powered by solar panels, with LED lighting upgrades completed in 2023. Thanks to our in-house production capability and spare parts department, there is reduced wastage of raw materials and products within our product pipeline. We segregate our waste on-site.

We have developed our packaging to reduce the use of polystyrene and increase its recyclability.

Since 2025, our marketing materials are developed in conjunction with a leading eco-friendly graphic design studio and printers.

This brochure was designed with green energy, and it is printed on FSC® Certified and Carbon Balanced paper.

QUALITY GUARANTEED

Image products are manufactured in accordance with ISO 9001 and EN 14428 and utilise toughened safety glass to EN12150-1 class A standard.

Aluminium sections are extruded to BS 1474 from alloys complying with BS 6463 and coated to BS 6464. Doors and enclosures have been tested in accordance with EN 14428.

The CE marking is a declaration that the product complies with the essential requirements of the European health, safety and environmental protection legislation.
